## EDUCATION

---

**B.S. in Computer Science, Yonsei University (Seoul, Korea)** 2017.03 – 2024.02

- GPA: 4.11 / 4.3 (Major GPA: 4.23 / 4.3)

**Incheon Science High School** 2014.03 – 2017.02

## PUBLICATIONS

---

**A 5/4 Bound for Graphic  $s$ - $t$  Path TSP on Subcubic Graphs** 2026

- In Proceedings of the 24th International Workshop on Approximation and Online Algorithms (WAOA 2026), L'Aquila, Italy. To appear.  
Link: <https://arxiv.org/abs/2608.11038>

## WORK EXPERIENCE

---

### Presto Labs (Seoul, Korea)

*Data Engineer — Vendor Data / Data Platform* 2025.11 – Present

- Build and operate point-in-time vendor data pipelines powering systematic equity and futures trading across 8 markets, from data ingestion through a Parquet + DuckDB lake to reader APIs and trading-system integration.
- Primary author of the Capital IQ Estimates dataset: redesigned legacy HDF5 matrices into a Parquet + DuckDB point-in-time lake that models vendor deliveries as an event log, eliminating look-ahead bias in backtests.
- Led the Compustat fundamentals lake migration: uncovered silent data-loss bugs in the legacy pipeline and proved cell-exact parity of the new implementation.
- Core contributor to the vendor data quality platform: built broad validation coverage and a point-in-time bias detector that catches retroactive changes to history.

### Ngine Studios @ NEXON Corp. (Gyeonggi-do, Korea)

*Software Engineer (Alternative Military Service)* 2020.10 – 2023.02

- Developed an ML model serving system and RESTful API servers.
- Developed cryptocurrency trading strategies using blockchain smart contracts.

### Samsung Research (Remote)

*Freelance Work* 2020.07 – 2020.10

- Developed a GAN-based image outpainting algorithm that extends the boundaries of segmentation images.

### Kakao Corp. (Jeju-do, Korea)

*Intern* 2019.01 – 2019.02

- Improved the thumbnail extraction algorithm used in [daum.net](https://daum.net).

## ACTIVITIES

---

### Samsung Software Membership

*Member* 2018.09 – 2024.09

- Received financial support for participating in worldwide programming competitions (e.g., ICPC World Finals).
- Contributed blog posts on problem solving & algorithms.  
Link: <https://infossm.github.io/authors/junodeveloper>

## PROGRAMMING CONTESTS (Selected)

---

**34th place, ICPC World Finals** 2021

- Received honors by ranking 34th out of 117 teams.

**2nd place, ICPC Asia Seoul Regional** 2019

- Awarded by the Minister of Science and ICT.
- Advanced to World Finals.

|                                                          |                   |
|----------------------------------------------------------|-------------------|
| <b>5th award, Samsung Collegiate Programming Contest</b> | <b>2018, 2019</b> |
| <b>5th award, Kakao Code Festival</b>                    | <b>2018</b>       |
| <b>1st place, Yonsei University Programming Contest</b>  | <b>2018, 2019</b> |
| <b>Bronze Prize, Korean Olympiad in Informatics</b>      | <b>2016</b>       |
| <b>Advanced to Google Code Jam Round 3</b>               | <b>2020, 2021</b> |

## AWARDS & HONORS

---

|                                                         |                                                       |
|---------------------------------------------------------|-------------------------------------------------------|
| <b>Semester High Honors</b>                             | <b>Spring 2018, Spring 2019, Fall 2019, Fall 2023</b> |
| <b>National Science and Technology Scholarship</b>      | <b>Fall 2019</b>                                      |
| <b>Honorable Mention, Samsung Humantech Paper Award</b> | <b>2016</b>                                           |

## SKILLS

---

**Languages:** Korean, English

**Programming Languages:** C/C++, Python, SQL, Java, TypeScript, Go, Rust, Solidity

**Libraries & Frameworks:** PyTorch, TensorFlow, Node.js, React.js

**Data & Infrastructure:** DuckDB, Parquet, pandas, NumPy, Airflow, FastAPI, Bazel
