Junho Hwang

junhohwang98@gmail.com | github.com/junodeveloper

Research Interests

Approximation algorithms, combinatorial optimization, graph algorithms, and computational geometry.

Education

Yonsei University (Seoul, Korea)
B.S. in Computer Science **2017.03 – 2024.02**

- **GPA: 4.11 / 4.3** (Major GPA: **4.23 / 4.3**)
- Semester High Honors: Spring 2018, Spring 2019, Fall 2019, Fall 2023
- National Science and Technology Scholarship, Fall 2019

Incheon Science High School **2014.03 – 2017.02**

Publications

A QPTAS for Stochastic Scheduling of Bernoulli Jobs **2026**

- **Junho Hwang** (sole author). Preprint, 2026.
  arXiv: https://arxiv.org/abs/2610.11481

An EPTAS for Vector Scheduling with Time Intervals **2026**

- **Junho Hwang** (sole author). Preprint, 2026.
  arXiv: https://arxiv.org/abs/2609.33493

A 5/4 Bound for Graphic *s-t* Path TSP on Subcubic Graphs **2026**

- **Junho Hwang** (sole author). In Proceedings of the 24th International Workshop on Approximation and Online Algorithms (WAOA 2026), L'Aquila, Italy. To appear.
  Preprint: https://arxiv.org/abs/2608.11038

Research Experience

Samsung Research (Remote)
Freelance Researcher **2020.07 – 2020.10**

- Conducted research on GAN-based image outpainting; developed an algorithm that extends the boundaries of segmentation images.

Work Experience

Presto Labs
Data Engineer **2025.11 – Present**

- Build and operate point-in-time vendor data pipelines powering systematic equity and futures trading across 8 markets.
- Redesigned vendor datasets into event-log-based point-in-time lakes (Parquet + DuckDB), eliminating look-ahead bias in backtests.
- Built a point-in-time bias detector for the data quality platform that catches retroactive changes to historical data.

Ngine Studios @ NEXON Corp. (Gyeonggi-do, Korea)
Software Engineer (Alternative Military Service) **2020.10 – 2023.02**

- Developed an ML model serving system and RESTful API servers.
- Developed cryptocurrency trading strategies using blockchain smart contracts.

Kakao Corp. (Jeju-do, Korea)
Intern **2019.01 – 2019.02**

- Improved the thumbnail extraction algorithm used in daum.net.

HONORS & AWARDS

34th Place (of 117 teams), ICPC World Finals **2021**

2nd Place, ICPC Asia Seoul Regional **2019**

- Minister of Science and ICT Award; advanced to World Finals.

5th Prize, Samsung Collegiate Programming Contest **2018, 2019**

5th Prize, Kakao Code Festival **2018**

1st Place, Yonsei University Programming Contest **2018, 2019**

Advanced to Google Code Jam Round 3 **2020, 2021**

Bronze Prize, Korean Olympiad in Informatics **2016**

Honorable Mention, Samsung Humantech Paper Award **2016**

ACTIVITIES

Samsung Software Membership
Member **2018.09 – 2024.09**

- Received financial support for participating in worldwide programming competitions (e.g., ICPC World Finals).
- Contributed technical blog posts on problem solving & algorithms: infossm.github.io/authors/junodeveloper

SKILLS

Languages: Korean (native), English (professional), Japanese (JLPT N2)
Programming Languages: C/C++, Python, SQL, Java, TypeScript, Go, Rust, Solidity
Libraries & Frameworks: PyTorch, TensorFlow, Node.js, React.js
Data & Infrastructure: DuckDB, Parquet, pandas, NumPy, Airflow, FastAPI, Bazel
